

IoT Gateway For KEPServerEX®

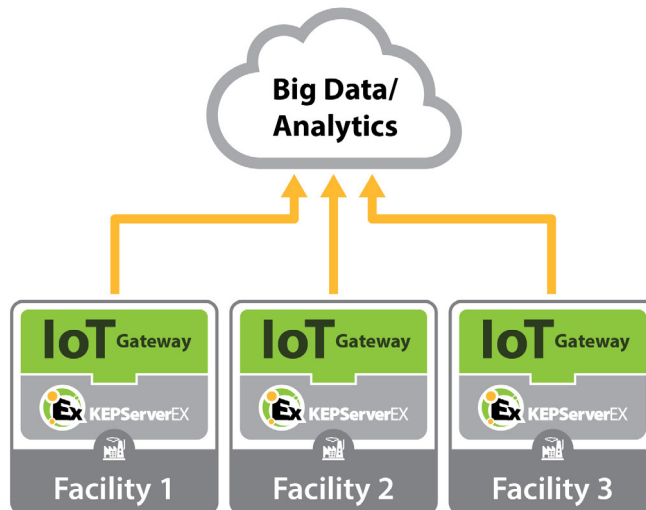

The IoT Gateway for KEPServerEX® connects Operations Technology (OT) with Information Technology (IT), enabling visibility across the enterprise. It leverages the 150+ communications drivers within KEPServerEX to seamlessly stream real-time industrial control data directly into Big Data and analytic software applications for Business Intelligence and Operational Excellence.

FEATURES

- Provides cloud-based enterprise business systems with access to real-time data from industrial equipment
- Leverages the 150+ drivers within the KEPServerEX communications platform to connect to any thing from one user interface
- Enables data collection from thousands of industrial sensors and machines, including PLCs, RTUs, PACs, DAQs, controllers, and many more
- Offers customizable JSON data format to support most MQTT and REST applications
- Supports deadband to limit data throughput
- Supports tag import and export for quick project configuration and deployment
- Has a configurable Publish Rate
- Has a configurable data package size for single transactions

SUPPORTED PROTOCOLS

- RESTful Web Services Client
- RESTful Web Services Server
- MQTT Client

PRODUCT DESCRIPTION:

- IoT Gateway Option
- Support & Maintenance

PART NUMBER:

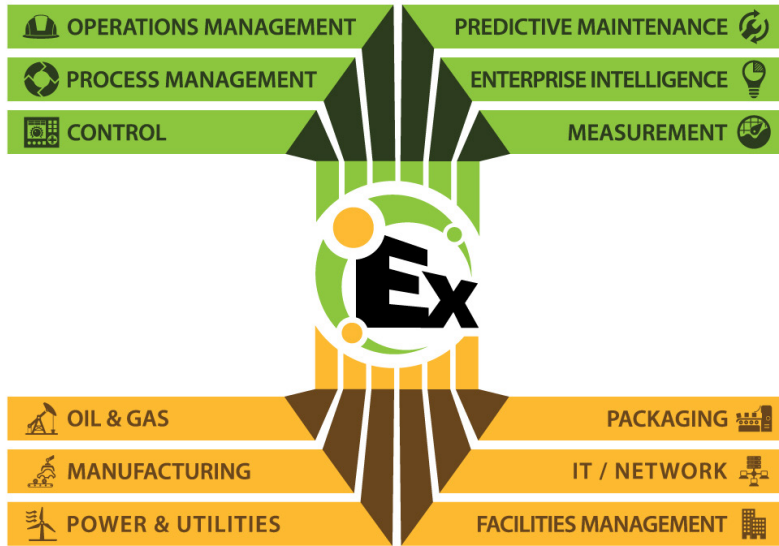

- EX5-IOTGW-NA01
- IND-IOTGW-SA21
